OBJECTIVE

Freshman at Texas A&M University seeking internship opportunities and experience for Summer/Fall 2026.

EDUCATION

Texas A&M University, College Station, Texas — Expected May 2029
General Engineering, Focus in Electrical Engineering, GPA: 4.00

PROJECTS

Mini Haptic Steering Wheel Controller
Made for TAMUHACK 2026 | Winner of Best Beginner Hardware Hack
Repo: github.com/ANGELOREYES-afk/FFBwheelACtelemtry

- Built a custom force-feedback steering system using a moteus BLDC controller, Python, and Arduino, generating real-time torque commands from simulator telemetry while enforcing torque limits and watchdog safety.
- Developed signal conditioning for haptics to improve feel while reducing unwanted oscillations
- Debugged and validated control behavior with live telemetry logging and iterative parameter tuning for different driving conditions.
- Applied embedded-style safety practices in a PC-based control system, including bounded outputs, explicit failure modes, and controlled resource cleanup on exit.

SPORA: Mycelium Soil Stabilization Mats
Design concept created for TAMU SHPEATHON 2026 | CEO, COO

- Served as acting CEO and COO, set product vision, owned stakeholder narrative, and drove milestone execution from concept through final pitch.
- Translated customer/regulatory needs into critical-to-quality (CTQ) requirements and measurable product specs.
- Defined supplier-facing acceptance criteria and incoming inspection checks for key inputs.

LEADERSHIP & ACTIVITIES

Society of Hispanic Professional Engineers, SHPE — Aug. 2025 – Present
Committee Involvement: Treasury, Technical Affairs, Scholastic Committees

- Coordinated a SHPE financial literacy workshop, managing logistics (room, agenda, outreach) to improve student readiness for budgeting and credit basics.
- Developed and delivered an introductory 3D printing workshop, creating beginner-friendly materials covering slicing workflow, printer setup, and common failure modes.
- Participate in social and educational events to build a network with professional peers.

Scouting America — Jan. 2018 – June 2025
Eagle Scout Project

- Supervised Eagle Project with 10+ volunteers over 20+ service hours
- Designed and constructed Bat Boxes for Fort Bend County Parks & Recreation to improve park quality through natural pest control by preserving the bat population
- Planned, budgeted and coordinated with Ft. Bend County Parks over project location, spending and timing to coordinate volunteering event

SKILLS

Languages: Fluent in Portuguese, Intermediate Spanish
Programming: Python, Java, C++, HTML, CSS
Technical: 3D Printing and Modeling, Arduino, Fusion 360, Word, Excel
